

Validating data

Worksheet 1

(a) Explain what is meant by validation.

(b) A validation check does not ensure that the data is correct, only that it is acceptable.

Give an example where the data may be acceptable but be incorrect.

Using examples explain the following validation checks.

(a) Presence check

(b) Type check

(c) Length check

(d) Range check

Validating data

Worksheet 1

(e) Format check
