**OXFORD CAMBRIDGE AND RSA EXAMINATIONS**  
**GCSE**  
**A502/01**  
**MATHEMATICS A**  
**Unit B (Foundation Tier)**

**THURSDAY 19 JANUARY 2012: Afternoon**  
**DURATION: 1 hour**

**SUITABLE FOR VISUALLY IMPAIRED CANDIDATES**

**Candidates answer on the Question Paper.**

**OCR SUPPLIED MATERIALS:**

**None**

**OTHER MATERIALS REQUIRED:**

**Geometrical instruments**  
**Tracing paper (optional)**

<p><b><u>WARNING</u></b>  <b>No calculator can be used for  this paper.</b></p>
-----------------------------------------------------------------------------------------

This paper has been pre modified for carrier language

**READ INSTRUCTIONS OVERLEAF**

## **INSTRUCTIONS TO CANDIDATES**

- Write your name, centre number and candidate number in the boxes on the first page. Please write clearly and in capital letters.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer ALL the questions.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Your answers should be supported with appropriate working. Marks may be given for a correct method even if the answer is incorrect.
- Write your answer to each question in the space provided. Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).

## **INFORMATION FOR CANDIDATES**

- The number of marks is given in brackets [ ] at the end of each question or part question.
- Your Quality of Written Communication is assessed in questions marked with an asterisk (\*).
- The total number of marks for this paper is 60.

## FORMULAE SHEET: FOUNDATION TIER

**Area of trapezium =  $\frac{1}{2}(a + b)h$**

**Volume of prism = (area of cross-section)  $\times$  length**

1 (a) Complete this table.

Fraction	Percentage
$\frac{3}{4}$	=
	= 10%

[2]

(b) (i) Jenny has these six cards.

Jenny arranges ALL of the cards to make a correct calculation.

Complete the three cards to show this calculation.

[1]

(ii) Jenny swaps  $\times$  for  $\div$  but keeps all the other cards.

She makes two DIFFERENT, correct calculations using the six cards.

Complete the cards to show these calculations.

7		$\div$		=	8
		$\div$		=	

[2]

- 2 (a) Tom buys a rose bush costing £3.40 and a garden fork costing £12.75.  
He pays with a £20 note.**

**How much change should he receive?**

**(a) £ \_\_\_\_\_ [3]**

**(b) (i) Gita sees these plants for sale.**

**FLOWERING PLANTS FOR SALE**

**£2.80 EACH OR**

**OFFER PRICE: 4 FOR £10**

**Gita buys 4 of these plants.**

**How much cheaper is it for Gita to buy 4 plants  
at the Offer Price than separately?**

**(b)(i) £ \_\_\_\_\_ [2]**

**(ii) These plants produce either red or white flowers.**

**Out of 80 plants, 7 produce white flowers.**

**Is this more or less than 10% of the plants?  
Show how you decide.**

**[3]**

3 (a) What type of angle is angle  $p$ ?

(a) \_\_\_\_\_ [1]

(b) Work out the size of angle  $f$ .

(b) \_\_\_\_\_  $^\circ$  [2]

- 4 (a) A square of side 3cm is drawn on a one-centimetre grid.

How many one-centimetre squares does it contain?

(a) \_\_\_\_\_ [1]

- (b) A square of side 8 cm is drawn on a one-centimetre grid.

How many one-centimetre squares does it contain?

(b) \_\_\_\_\_ [1]

- (c) A square is drawn on a one-centimetre grid and contains 225 of the one-centimetre squares.

How long is one of its sides?

(c) \_\_\_\_\_ cm [1]

- (d) A square of side  $h$  cm is drawn on a one-centimetre grid.

Complete this statement.

- (d) This square contains \_\_\_\_\_ one-centimetre squares. [1]

- (e) A large cube is made using one-centimetre cubes. Each edge of the large cube is 10 cm long.

How many one-centimetre cubes are used to make the large cube?

- (e) \_\_\_\_\_ [1]

- 5 (a) This graph shows the percentage of carbon dioxide in the atmosphere from 1700 to 1995.

In approximately which year was the percentage of carbon dioxide in the atmosphere 0.031?

(a) \_\_\_\_\_ [1]

**(b) This graph shows the world average temperatures from 1865 to 1995.**

**Describe how world average temperatures have changed from 1865 to 1995.**

**Use figures from the graph in your answer.**

**[3]**

**6 Here are some situations and some formulas.**

	Situation
<b>1</b>	The distance all around any regular polygon is the same as the number of sides multiplied by the length of one side.
<b>2</b>	Alma and Tessa shared a bag of sweets equally and there was one sweet left. How many sweets altogether were in the bag?

	Formula
<b>a</b>	$t = 2h + 1$
<b>b</b>	$p = 5g$
<b>c</b>	$p = fg$
<b>d</b>	$t = \frac{m}{2} + 1$

**(a) Match each situation to a formula representing it. Write the letter for the correct formula next to the number of the situation in the answer space.**

**(a) Situation 1: Formula \_\_\_\_\_**

**Situation 2: Formula \_\_\_\_\_ [2]**

**(b) For Situation 2 in part (a), explain clearly what each letter represents in the formula you have chosen.**

**[2]**

**7 Alan makes drinks mats.**

- (a) He cuts out a wooden base that is a regular hexagon of side 3 cm.**

**Alan covers the top of the base with a pattern of tiles.**

**The tiles are equilateral triangles of side 3 cm.**

- (i) On the triangular spotty paper, show accurately the pattern of tiles that covers the base.**

**[2]**

- (ii) Alan uses black triangular tiles and white triangular tiles.

Shade your drawing in part (i) so that it has EXACTLY 2 lines of symmetry. [2]

- (iii) Using your drawing, work out the sum of the interior angles of a regular hexagon.

(a)(iii) \_\_\_\_\_ ° [2]

**(b) Alan designs a new drinks mat.  
He uses eight of the equilateral triangular tiles to  
make a quadrilateral.**

**(i) On the triangular spotty paper below, draw a  
quadrilateral that he could make.**

**[2]**

**(ii) Give the mathematical name of your  
quadrilateral.**

**(b)(ii) \_\_\_\_\_ [1]**

**8\* Paul and Adile talk about their homework.**

**Paul says, 'I can draw a triangle with two obtuse angles in it.'**

**Adile says, 'I can draw a quadrilateral with two obtuse angles in it.'**

**Is Paul correct?**

**Is Adile correct?**

**Explain your reasons.**

**[5]**

- 9 (a) When  $\frac{1}{9}$  is changed to a decimal it is recurring,  
like this:

0.11111111 .....

Show how you would indicate that the decimal is recurring.

(a) \_\_\_\_\_ [1]

- (b) Using division, change  $\frac{5}{6}$  to a decimal.

(b) \_\_\_\_\_ [3]

(c) When  $\frac{1}{9}$  and  $\frac{1}{3}$  are changed to decimals, both are recurring.

Write down a fraction between  $\frac{1}{9}$  and  $\frac{1}{3}$  that is NOT recurring.

(c) \_\_\_\_\_ [1]

- 10 A website gives the price and engine size for different models of one manufacturer's cars.**

<b>Engine size (litres)</b>	<b>Price (£)</b>
<b>1.3</b>	<b>12 360</b>
<b>1.4</b>	<b>13 345</b>
<b>1.6</b>	<b>16 695</b>
<b>1.8</b>	<b>20 495</b>
<b>2</b>	<b>20 095</b>
<b>2</b>	<b>24 295</b>
<b>2</b>	<b>29 945</b>
<b>2.2</b>	<b>27 345</b>
<b>2.5</b>	<b>25 745</b>

- (a) Complete the scatter graph below.  
The first six points have been plotted for you.

[2]

- (b) Draw a line of best fit on your scatter graph. [1]

- (c) Describe the correlation between price and engine size.

(c) \_\_\_\_\_ [1]

- (d) This manufacturer is planning to produce a car with a 1.7 litre engine.

What might you expect its price to be?

(d) £ \_\_\_\_\_ [1]

- (e) One of the cars is a sports model that is more expensive than other cars with the same engine size.**

**Put a ring round the point that represents the sports model.**

**[1]**

**BLANK PAGE**

- 11 (a) On the grid, draw the graph of  $y = 4 - 2x$  for  $x$  from -2 to 3.

[3]

**(b) On the same grid, draw the graph of  $y = 3$  and use it to solve these simultaneous equations.**

$$y = 4 - 2x$$

$$y = 3$$

**(b)  $x =$  \_\_\_\_\_**

**$y =$  \_\_\_\_\_ **[3]****
