

**OXFORD CAMBRIDGE AND RSA EXAMINATIONS  
AS GCE  
4752  
MATHEMATICS (MEI)**

**Concepts for Advanced Mathematics (C2)  
QUESTION PAPER**

**FRIDAY 18 MAY 2012: Morning  
DURATION: 1 hour 30 minutes  
plus your additional time allowance**

**MODIFIED ENLARGED**

**Candidates answer on the Printed Answer Book or any suitable paper provided by the centre. The Printed Answer Book may be enlarged by the centre.**

**OCR SUPPLIED MATERIALS:**

**Printed Answer Book 4752  
MEI Examination Formulae and Tables (MF2)**

**OTHER MATERIALS REQUIRED:**

**Scientific or graphical calculator**

**READ INSTRUCTIONS OVERLEAF**

## **INSTRUCTIONS TO CANDIDATES**

**These instructions are the same on the Printed Answer Book and the Question Paper.**

- **The Question Paper will be found in the centre of the Printed Answer Book.**
- **Write your name, centre number and candidate number in the spaces provided on the Printed Answer Book. Please write clearly and in capital letters.**
- **WRITE YOUR ANSWER TO EACH QUESTION IN THE SPACE PROVIDED IN THE PRINTED ANSWER BOOK.** Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).
- **Use black ink. HB pencil may be used for graphs and diagrams only.**
- **Read each question carefully. Make sure you know what you have to do before starting your answer.**
- **Answer ALL the questions.**
- **You are permitted to use a scientific or graphical calculator in this paper.**
- **Final answers should be given to a degree of accuracy appropriate to the context.**

## **INFORMATION FOR CANDIDATES**

**This information is the same on the Printed Answer Book and the Question Paper.**

- **The number of marks is given in brackets [ ] at the end of each question or part question on the Question Paper.**
- **You are advised that an answer may receive NO MARKS unless you show sufficient detail of the working to indicate that a correct method is being used.**
- **The total number of marks for this paper is 72.**

## **INSTRUCTION TO EXAMS OFFICER/INVIGILATOR**

- **Do not send this Question Paper for marking; it should be retained in the centre or recycled. Please contact OCR Copyright should you wish to re-use this document.**

## SECTION A (36 marks)

- 1 Find  $\frac{dy}{dx}$  when  $y = \sqrt{x} + \frac{3}{x}$ . [3]
- 2 Find the second and third terms in the sequence given by
$$u_1 = 5,$$
$$u_{n+1} = u_n + 3.$$
Find also the sum of the first 50 terms of this sequence. [4]
- 3 The following diagram is Fig. 3.

Fig. 3

In Fig. 3, BCD is a straight line. AC = 9.8 cm, BC = 7.3 cm and CD = 6.4 cm; angle ACD = 53.4°.

- (i) Calculate the length AD. [3]
- (ii) Calculate the area of triangle ABC. [2]

- 4 The point P (6, 3) lies on the curve  $y = f(x)$ . State the coordinates of the image of P after the transformation which maps  $y = f(x)$  onto
- (i)  $y = 3f(x)$ , [2]
- (ii)  $y = f(4x)$ . [2]
- 5 A sector of a circle has angle 1.6 radians and area  $45\text{ cm}^2$ . Find the radius and perimeter of the sector. [5]
- 6 Fig. 6 below shows the relationship between  $\log_{10} x$  and  $\log_{10} y$ .

Fig. 6

Find  $y$  in terms of  $x$ . [5]

- 7 The gradient of a curve is given by  $\frac{dy}{dx} = 6x^{\frac{1}{2}} - 5$ . Given also that the curve passes through the point (4, 20), find the equation of the curve. [5]
- 8 Solve the equation  $\sin 2\theta = 0.7$  for values of  $\theta$  between 0 and  $2\pi$ , giving your answers in radians correct to 3 significant figures. [5]

# **BLANK PAGE**

## **SECTION B (36 marks)**

- 9 A farmer digs ditches for flood relief. He experiments with different cross-sections. Assume that the surface of the ground is horizontal.**

- (i) The following diagram is Fig. 9.1.**

**Fig. 9.1**

**Fig. 9.1 shows the cross-section of one ditch, with measurements in metres. The width of the ditch is 1.2 m and Fig. 9.1 shows the depth every 0.2 m across the ditch.**

**Use the trapezium rule with six intervals to estimate the area of cross-section. Hence estimate the volume of water that can be contained in a 50-metre length of this ditch. [5]**

- (ii) Another ditch is 0.9 m wide, with cross-section as shown in Fig. 9.2 below.

Fig. 9.2

With  $x$ - and  $y$ -axes as shown in Fig. 9.2, the curve of the ditch may be modelled closely by  
 $y = 3.8x^4 - 6.8x^3 + 7.7x^2 - 4.2x$ .

- (A) The actual ditch is 0.6 m deep when  $x = 0.2$ . Calculate the difference between the depth given by the model and the true depth for this value of  $x$ . [2]
- (B) Find  $\int (3.8x^4 - 6.8x^3 + 7.7x^2 - 4.2x) dx$ . Hence estimate the volume of water that can be contained in a 50-metre length of this ditch. [5]

- 10** (i) Use calculus to find, correct to 1 decimal place, the coordinates of the turning points of the curve  $y = x^3 - 5x$ . [You need not determine the nature of the turning points.] [4]
- (ii) Find the coordinates of the points where the curve  $y = x^3 - 5x$  meets the axes and sketch the curve. [4]
- (iii) Find the equation of the tangent to the curve  $y = x^3 - 5x$  at the point  $(1, -4)$ . Show that, where this tangent meets the curve again, the  $x$ -coordinate satisfies the equation

$$x^3 - 3x + 2 = 0.$$

Hence find the  $x$ -coordinate of the point where this tangent meets the curve again. [6]

- 11** A geometric progression has first term  $a$  and common ratio  $r$ . The second term is 6 and the sum to infinity is 25.
- (i) Write down two equations in  $a$  and  $r$ . Show that one possible value of  $a$  is 10 and find the other possible value of  $a$ . Write down the corresponding values of  $r$ . [7]
- (ii) Show that the ratio of the  $n$ th terms of the two geometric progressions found in part (i) can be written as  $2^{n-2} : 3^{n-2}$ . [3]
