

# Candidate Marks Report

*Series : 6 2018*

This candidate's script has been assessed using On-Screen Marking. The marks are therefore not shown on the script itself, but are summarised in the table below.

---

Centre No :	Assessment Code :	H081
Candidate No :	Component Code :	01
Candidate Name :		

---

Total Marks :

In the table below 'Total Mark' records the mark scored by this candidate.  
'Max Mark' records the Maximum Mark available for the question.

Question Part

1	i	one distinctive coastal landform is the cliff. The water has eroded away the rock to create a cliff.
	ii	one way geology has influenced the shape of the landform is by different types of rock. on the bottom of the cliff it has harder more resistant rock and on the top of the cliff it is more weaker than the bottom.
	b	A Spit is formed by long shore drift sediment flows up the beach but at an angle and where the beach starts to curve that's where the sediment is deposited and as it is deposited more sediment follows the same path so it builds and builds until it rises above the water.
	c	Human activity is the main cause of landscape change within coastal systems because humans build coastal defences such as sea walls and groynes. This disrupts nature's natural course so it changes where deposition occurs and places become eroded.

Question Part

		Also humans are causing <del>the</del> global warming and as it heats up the ice caps melt and sea levels rise. This will dramatically affect landscape change because as the water is higher it will climb higher up the beaches and erode more.
4	a	One way religion influences someone's perception of a place
4	b1	Out of work benefit recipients, because Barking and Dagenham have 13.2% and Kingston-upon-Thames only has 5.4% that is a 7.8% difference.
	ii	one reason for social inequality is that the area, it may have a bad reputation, also in the area there might not be as many jobs so unemployment is high which causes landlord evictions.
	c	on figure 4 you can see plans for a community site. one distinctive feature that architects have put in is the <del>see</del> green spaces
