

Support highlights

We know teaching has been greatly disrupted in 2020, so to support you we have collated some of our most useful resources. These include materials that will focus your teaching on individual abilities of students, help determine their capabilities and above all save you time. They will enable you to quickly get back up to speed in the classroom and support your students in preparing for exams. Many more resources are available from the [OCR website](#).

Schemes of work

[Download our schemes of work](#)

Our schemes of work provide you with suggested content that could be delivered with the specification. They also provide a suggested hours of teaching time to help you plan your approach to delivery. Students might wish to use these as checklists to support their overall understanding of a given topic. Each scheme of work also includes suggested reading lists where further in-depth information could be found on any given aspect of the course.

Updated International Relations delivery guide (for first assessment 2021)

[Download our updated International Relations delivery guide](#)

Delivery guides are designed to represent a body of knowledge about teaching a particular topic and contain a clear outline of the content covered by the delivery guide. This includes:

- Expert guidance on the key concepts involved.
- Common difficulties students may have.
- Approaches to teaching that can help students understand these concepts and how this topic links conceptually to other areas of the subject.
- A range of suggested teaching activities using a variety of themes so that different activities can be selected which best suit particular classes.
- Learning styles or teaching approaches.

Please note this resource is valid for first teaching from September 2019 and first assessment in 2021. See our website for more details.

Guide to assessment

[Download our guide to assessment](#)

Our guide to assessment provides you and your students with all the information you need to access the exam questions. Each question type is fully analysed, and examples of good practice are given. They also contain candidate style answers to help exemplify the strengths and weaknesses of different responses. This guide was written with students in mind, so we would certainly encourage its use by them to support their own understanding of the exams.
