

Support highlights

We know teaching has been greatly disrupted in 2020, so to support you we have collated some of our most useful resources. These include materials that will focus your teaching on individual abilities of students, help determine their capabilities and above all save you time. They will enable you to quickly get back up to speed in the classroom and support your students in preparing for exams. Many more resources are available from the [OCR website](#).

Schemes of work

[Download our schemes of work](#)

Our schemes of work provide you with suggested content that could be delivered with the specification. They also provide a suggested hours of teaching time to help you plan your approach to delivery. Students might wish to use these as checklists to support their overall understanding of a given topic. Each scheme of work also includes suggested reading lists where further in-depth information could be found on any given aspect of the course as well as assessment ideas and site proposal forms for history around us.

Guide to assessment

[Download our guide to assessment](#)

Our guide to assessment provides you and your students with all the information you need to access the exam questions. Each question type is fully analysed, and examples of good practice are given. They also contain candidate style answers to help exemplify the strengths and weaknesses of different responses. This guide was written with students in mind, so we would certainly encourage its use by them to support their own understanding of the exams.
